

PARAREV DATA EDITOR (PDE)

Healthcare organizations welcome new technology solutions every day, especially if it can streamline their internal business process for improving the revenue cycle. However, they find it overwhelming to manage or maximize the functionalities of multiple technology platforms on daily basis for their revenue cycle management needs. Huge budget cuts, cost saving initiatives and the uncertainty of not using the technology to its fullest has lead healthcare providers to consolidate to a single source platform in order to save time, money and resources.

The purpose of the **ParaRev Data Editor (PDE)** is to have a web-based single source and cloud computing solution to avoid loss of reimbursement and improve your revenue cycle process.

The **ParaRev Data Editor (PDE)** system deliverables include providing a centralized, online, encyclopedic resource of current and historic regulatory information, code book subscriptions, charge master guidelines, and hospital specific revenue management data.
